3rd Call for Papers

BARCELONA, SPAIN. JUNE 26-29, 2007

The series of MEMSWAVE International Symposia, which started in 2000 in Sinaia (Romania) and is thus at its 8<sup>th</sup> edition, is presently organized by the AMICOM (Advanced MEMS For RF and Millimeter Wave Communications) Network of Excellence.

The Symposium will provide an international forum for scientists and industrialists for the exchange of information on the most recent advances and best achievements in the area of RF MEMS with emphasis on European activities. The Symposium consists of three events: the MEMSWAVE Conference (26-27 June), the 2<sup>nd</sup> RF MEMS Workshop on Industry Application (28 June) and the RF-MST Workshop Cluster Meeting (29 June), a meeting organized by AMICOM in collaboration with the European Commission, where the achievements of MEMS-related EU projects will be presented and discussed.

The Symposium is aimed to cover, but is not limited to, the following RF MEMS topics:

- Design and simulation tools (Electromagnetic, Mechanical, Thermal)
- Fabrication, process and materials
- Packaging, assembling, 3D integration
- Components and circuits
- Antennas
- MEMS and IC integration
- Reliability and testing
- Applications and system design
- FBAR and BAW

The Symposium is technically sponsored by the European Microwave Association (EuMA) and organized by UPC (Technical University of Catalunya, Barcelona).
