

The **Centre Tecnològic de Telecomunicacions de Catalunya** is a supra-university research center established in Barcelona (Spain) which is devoted to basic and applied R&D related to the physical and lower layers of communications systems. Currently, the CTTC is interested in filling a *Technical Support* position.

#### **Technical Support position:**

- IT systems management (1 position): Advanced knowledge in Linux Services (email, DNS, NIS, Samba, OpenVpn, Firewalling, Web Server, etc), TCP/IP, CCNA certification for Cisco routers and switch configuration (802.1q, Spanning-tree, Etherchannel, OSPF, ACL, etc) is desirable. Practical experience in Windows XP and 2000 Administration/Support, Perl and Shell script programming, HTML and Mysql/Postgres Databases is highly appreciated.

#### **Qualifications and experience:**

Applicants must hold at least a BSc/Technical Engineering degree in computer science or telecommunications. Work experience of minimum 1 year is required.

#### **Conditions:**

The position is permanent. The rank and gross salary, in the range 18,000-24,000 €/year, will be determined according to qualifications and work experience.

Please, submit applications electronically including a **resume**, **academic ratings**, and, preferably, the names and contact information of **three referees**, to:
